## Aluminium Asphalt Roof Edge Trim

### Overview

Aluminium roof edge trim is extruded from 6063/T6 aluminium. This provides a resilient finish that is not affected by atmospheric pollution and will not rust. They are supplied in 3m lengths and can be easily cut on site to follow the alignment of the roof edges, and are suitable for both new build and refurbishment projects. Profiles are available from stock in mill finish, and can be powder coated to special order. Preformed corners are available for all trim profiles and eliminate the need for on-site mitre cutting, ensuring a neat, accurate and watertight detail at any change in roof edge direction. Standard size 90° external and internal corners are available from stock. Bespoke corners are available to special order, to suit specific requirements.

### Details

<b>Material</b>	Aluminium 6063-T6
<b>Dimensions</b>	See 'Part information'

### Performance

<b>Warranty</b>	10 years
-----------------	----------

### Part Information

Code	Face Size	Coverage	Fixing Arm	Length	LM per box
AA2	75mm	52mm	75mm	3m	30m
AA3	100mm	77mm	75mm	3m	30m
