Self-levelling Adjustable Joist Support Pedestal

Overview

The RDA Self-Levelling Adjustable Joist Support Pedestal is a plastic support pedestal for decking and railing applications. Its "ball and socket" floating head design allows for slope correction on tapered roofs, and the adjustable thread provides millimetre-perfect adjustability across a large height range, making speedy and straightforward installation.

- Millimetre-perfect height adjustment
- Large height range available
- Cut-off base allows for placement against the wall abutment
- Height extension collar raises the total height in 100mm increments
- Holes in base allow drainage and fixing to substrates
