Termination Profile

Patent number: GB 2582618

Overview

The Termination Profiles for Aluminium Decking are closure profiles designed to close off the edge of a decked area. Available to suit all RYNO® aluminium decking boards, these profiles are used when the end or side of the boards are visible, a picture frame detail is desired, or when the designer or installer prefers to cover cut edges.

The E termination profile provides an additional support leg when the deckboard has been ripped down and features a hidden fixing detail. The L termination profile sits across board ends or along the side of a complete board and is secured discreetly through the top face using pop-rivets.

- Closure profiles for aluminium decking
- Available to suit all RYNO® aluminium decking boards
- E and L termination profiles
- Provides a finished look to your decking project

Details

Weight	0.45kg/m
Dimensions	See “Part Information” below

Performance

Reaction to fire (BS EN 13501-1)	A2-s1, d0
Warranty	30 years*
Design Life	60 years

*when used as part of a complete RYNO IGNO system

Part Information

Code	Visible surface	Length
E Profile	16mm	3.6m
L Profile	16mm	3.6m
