

BBR Ballast Bracket

Overview

The Ballast Bracket is an aluminium bracket that works with all RYNO TerraSmart systems featuring the DS joists. Simply fixed to the side of the DS Aluminium Joists, it is designed to create a 'shelf' to carry 600x600mm concrete ballast slabs, beneath the finished deckboard surface. It is the simplest way of increasing resistance against the effects of wind uplift, by increasing the dead weight of the system being installed.

- Simple to install
- Quickly add dead weight to the system
- Increases resistance against wind uplift
- Compatible with DS Aluminium Joists

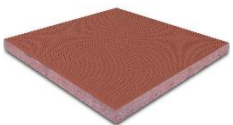

Details

Material	Aluminium 1050A H14
Dimensions	40x40x32mm, 3mm thick

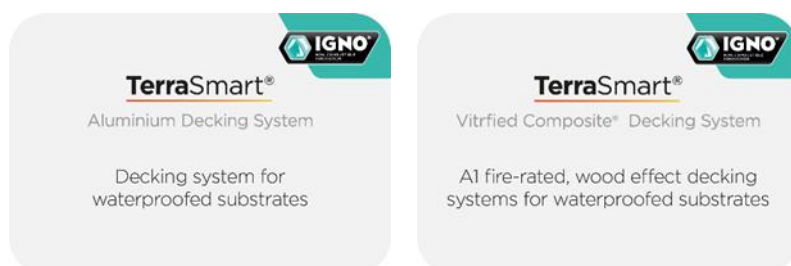

Performance

Reaction to fire (BS EN 13501-1)	Inherently A1 (Decision 94-611/EC)
Allowable load	>80kg per bracket
Biological and chemical	Resistant to moulds, algae, alkali, bitumen, UV

Compatible Components

	DS Aluminium Joist		PHS Pan-head Screw
	CP-AD Adira Concrete Paver		

Compatible Systems
