Pedestal Cantilever Bracket

Overview

The Pedestal Cantilever Bracket is designed to provide support for pavers around the perimeter of an area that need to cantilever beyond the edge of the pedestal, due to the roof build up below the paved surface. Made from mill finished aluminium and designed to neatly glide onto the RP-FR fixed head pedestal head, this product solves a tricky problem whilst maintaining non-combustibility of the system. The aluminium can be easily drilled to provide a locating hole for the paving spacer.

- Inherently non-combustible
- Quick and easy to install
- Problem solving solution

Details

Material	Aluminium 6063-T6
Dimensions	100x850mm

Performance

Reaction to fire (BS EN 13501-1)	Inherently A1 (Decision 94-611/EC)
Maximum cantilever	100mm
Biological and chemical	Resistant to moulds, algae, alkali, bitumen, UV

Compatible Components

	RP-FR Non-combustible Fixed Head Adjustable Paving Support Pedestal		PT-QU Quadro Porcelain Paver
	ESC Edge Spring Clip
