Aluminium Soffit Trim

Overview

The Aluminium Soffit Trim is a versatile profile that can be used to extend and support the edge details of the Aluminium Frame Soffit Board; it can be used to close the gap between façade and soffit, to support the edges of whole boards, and support boards that have been cut down. The clever design enables 1 profile to be used in all possible instances, and it mates with a cover cap to ensure a tidy detail with hidden fixings.

- Made from non-combustible aluminium
- Seamless integration with Frameless Soffit Board
- Hidden Fixings

Details

Material	Aluminium 6063-T6
Dimensions	67x3600mm
Weight	0.6kg/m
